

WELCOME TO

Runway Flight Simulators would like to welcome you and your team to our simulator centre whereby everyone in your group will be given expert tuition and the opportunity to fly our full fleet of simulators that includes a Boeing 737-800 commercial airliner, a post war Vulcan B.2 nuclear bomber and our unique pair of WW2 MkIX. Supermarine Spitfires.

Arrival

Upon arrival at our simulator centre, usually 15-20 minutes before your session is due to start, you will be welcomed by dedicated members of our team and qualified instructors and offer you complimentary drinks and a tour of the facility whilst you wait for the other members of your team to arrive. Once everyone has arrived, everyone will be briefed.

Your team members will fly the 737 as it should do, with a choice of 24,000 airports to fly to and from. The Vulcan can be flown on low level missions at high speed and the Spitfires can be flown as a pair, either with each other to intercept and engage with the enemy or even against each other to see who can become an "ace" pilot.

We have planned a great time for you all and hope that you enjoy yourselves. To give you an idea of what will happen on the day, we have created the following checklist that explains what you can expect from us and in return, what we would like from you and your team.

What to expect

BRIEFING

Our team of instructors will brief everyone in the group about the simulators and how to make the best use of your flying time with us. Your group can choose who flies which aircraft type first, but everyone will be able to fly all the simulators during your session. Depending upon the size of your group, there may be some time that some will not be flying so they are welcome to sit in our immersive 737 cabin or watch from the rear of the Vulcan and Spitfires, offering enthusiastic criticism to their colleagues of course.

FLIGHTS

Upon aircraft allocation, the pilots in your group will receive expert tuition from our instructors on how to fly the aircraft and how to complete the mission. This will involve getting to know the instruments and controls as well as tuition on how to fly the aircraft.

During the session

As everyone will be able to fly all the simulators during the session, some of which are harder to fly than others, your time with us can be tailored to those who prefer a specific aircraft type. In addition, the session is designed around you and your team so if you have a specific mission in mind, a particular airport that you would like to fly to and from or would like more advice on handling techniques, simply ask our instructors. In addition, everyone can take as many pictures or videos as they like during the session and are free to use them on any social media platform.

SESSION END

At the end of the session, all participants are encouraged to have a large group photograph taken as a memento of their day. In addition, our team will be on hand to assist in any shop purchase and additional flight experience any of your team may wish to purchase for themselves or a loved one. A discount will be offered to them on the day.
